### **Veterinary Certificate**

I certify that on Monday 29th January, 2018, I examined for health and insurance purposes the horse described in the table below. The lungs and heart were auscultated and found to be normal, the temperature was normal, and there was no evidence of previous abdominal surgery. There was no evidence of infection or disease, no evidence of laminitis, no ataxia and there was no lameness observed at a walk and trot. Flexion tests were not performed.

The left eye was examined by a veterinary surgeon on the 23rd of January, 2018, following suspected superficial injury. Treatment was instigated at this point. Re-examination today revealed a small ulcer, approximately 2mm diameter, remaining on the cornea. The eye appears to be responding well to ongoing treatment. Repeat examination is planned in approximately 3-5 days. In my opinion it is unlikely that this injury will cause any permanent ocular problems, or visual impairment, and it is hoped should continue to heal completely.

The horse was in good condition, average to above average size for age and a suitable subject for mortality insurance purposes.

I do not have any financial or other interests in the syndication or partnership or the monies to be raised for syndication. The certificate has been prepared for inclusion in the disclosure statement and may be relied upon by the prospective investors into the syndication/partnership.
